WORK EXPERIENCE

Full-Stack Software Engineer
Sept 2024 - Present

Bilby Ltd. (Hong Kong, Remote)

- 100% **speed improvement on page speeds** by eliminating waterfall queries and parallelizing data fetching.
- **Worked on an agentic RAG chat system** with image uploads, resumable streaming, and an AI-controlled artifacts system.
- **Architected a multitenant system with internationalization** enabling sales to spin up tailored demo environments without engineering involvement.
- Tech Stack: NextJS, SvelteKit, TypeScript, tRPC, ElasticSearch, PostgreSQL, OpenAI, GCP

Senior Full-Stack Software Engineer
Jul 2023 - Sept 2024

The Pique Lab Lte. (Singapore, Remote)

- Migrated a large CRA codebase to Vite, **reducing build times from 6 minutes to 2 minutes** and improved dev server cold starts from **2 minutes to 0.5 seconds**.
- Worked on CRM/ERP webapps (React), backend services (GraphQL), mobile apps (React Native), and realtime VoIP and SMS communication services (Twilio).
- Optimized encryption/decryption which reduced durations by **98% (30s to 0.5s)** for protecting our data.
- Migrated a legacy React Native CLI app to pure Expo with pre-builds, improving integrations with native dependencies, streamlining deployments to TestFlight.

Software Developer Trainee
Jan - May 2023

Spring Valley Tech Corp. (Bago City, Philippines)

- Incubator-style internship on the R&D side of the company.
- Led a team of 5 developers as Tech Lead on a startup project encompassing a mobile app (Flutter), admin dashboard (NextJS), and backend service (tRPC).
- Automated the API documentation workflow, improving productivity by 200%.
- Tech Stack: Flutter, ReactJS, NextJS, TypeScript, tRPC, PostgreSQL, Prisma

EDUCATION

West Visayas State University
B.S. Computer Science, Artificial Intelligence major

- GWA 1.12 (2nd Highest in the University)
- Summa Cum Laude
- Most Outstanding CICT Student (Rank 1 – College)
- Dean's Medal for Proficiency in Computer Science – Artificial Intelligence Track (Rank 1 - Department)
- Most Outstanding Intern – Computer Science

SKILLS

Languages: TypeScript, JavaScript, Rust, Dart, Python, Go, C#, SQL

Web & Mobile: ReactJS, NextJS, SvelteKit, SolidJS, TailwindCSS, SCSS, Redux, Zustand, React Native, Expo, Flutter, TanStack Query, Apollo, URQL, Vike, TanStack Start

Backend: NodeJS, Express, Hono, tRPC, GraphQL, Socket.io, Lucia, FastAPI, Flask, Prisma, Drizzle, Kysely

Databases: PostgreSQL, SQLite (Turso), MongoDB, Firebase, CockroachDB, MySQL, Convex, SpacetimeDB

CMS: Wordpress, Woocommerce, PayloadCMS, Prismic, Strapi, Directus

Infrastructure & DevOps: Linux, AWS S3, SES, VPS, Sentry, PostHog, Vercel, Docker, Git, Github Actions, Vitest, Playwright, Dokploy, Cloudflare, GCP

AI & Machine Learning: Keras, Tensorflow, PyTorch, OpenAI, RAG, Google Colab, Anthropic

PROJECTS & OSS Contributions

ScolioVis.app *(scoliovis.app)*
An AI-based scoliosis measurement tool with **91% accuracy**. My undergrad thesis. Trained the models from **600+** spine images. Made with Next.JS, FastAPI, PyTorch, Zustand, Google Colab.

Open Source
- Vike - A framework-agnostic alternative to NextJS. Actively contributing to vike-solid and its ecosystem.
- Solid Sonner - toast notifications for SolidJS.
- SolidJS Community Primitives createSpring - adopted into the official SolidJS Community Primitives package. One of few community-authored primitives accepted into the canonical ecosystem.
- crabcode - a faster, more intuitive coding agent made in Rust.
- lazygitrs - A faster, memory-safe, more ergonomic port of lazygit in rust (w/ AI commit gen, better diff).
- gittydocs - The most low-friction documentation framework w/ ai, partial search, and easy deployment.
- iconmate - CLI tool for icon management and generation written in rust.
- reyes - Means “rust + eyes”. CLI tool for computer-use agents to simulate computer events / read the screen.
- bagon-hooks - A collection of zero-dependency hooks for SolidJS.
